

MWANGI BRIAN

Software Engineer | Web3 & Full-Stack Developer

Nairobi, Kenya | +254791948842 | wambuimwangibrian@gmail.com [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

A results-driven Software Engineer with a strong foundation in blockchain technology, web development, and system operations. Certified by Moringa School and currently pursuing a degree in Psychology, I bridge the gap between technical efficiency and user-centric design. Proven expertise in the Cardano ecosystem, PHP/Laravel, and React JS, with a track record of leading cross-functional teams and delivering scalable open-source solutions.

TECHNICAL SKILLS

Languages:

PHP (Laravel), JavaScript (React JS), Python (Flask), HTML5, CSS3.

Blockchain:

Cardano Ecosystem, Project Catalyst, Governance (1694.io), Smart Contract Interaction.

Databases & DevOps: PostgreSQL, MySQL, Docker, Git/GitLab/GitHub, Vercel.

CMS & Tools: WordPress Development, Salesforce, Google Workspace, Microsoft Office.

WORK EXPERIENCE

Software Developer | Lido Nation Foundation

April 2025 – Present

(Operation - Hybrid)

Support system efficiency and technology management for a leading Cardano developer workshop.

Tech Stack: PHP, Laravel, React JS, PostgreSQL, Docker, Git/GitLab.

- **Catalyst Explorer:**
Engineered a transaction confirmation module that allows users to verify blockchain transactions in real-time using transaction hashes/IDs, deepening platform transparency.
- **1694.io (Governance Tracker):**
Architected data pipelines to transform unstructured Cardano blockchain data into intuitive dashboards for tracking governance proposals and DRep (Delegate Representative) activities.
- **Parameters Explorer:**
Developed a comprehensive classification system for Cardano's network parameters (Economic, Governance, Network), making complex blockchain settings searchable, filterable, and accessible via descriptive technical articles.
- **AdaPay for WooCommerce:**
Extended the functionality of the AdaPay plugin by integrating KES (Kenya Shillings) as a local currency option, enabling merchants to accept ADA while viewing real-time local currency conversions.
- **Lido Impact (Lead Developer):**
Spearheaded the "Lido Impact" project, designing a seamless donation workflow for cryptocurrency holders to contribute directly to social causes without the friction of manual currency swapping.
- **Mentorship & Community:**
Served as a mentor at the Blockchain Centre Nairobi, guiding volunteer developers and ambassadors through blockchain architecture and community-building initiatives.

Web Developer | Blockchain Centre Nairobi

Jun 2026 – Sept 2026

(Operation - Remote)

- **Digital Infrastructure:**
Collaborated on the development and maintenance of the official organization website.
- **Hybrid Architecture:**
Implemented a component-based system merging WordPress with a React-based application layer to enhance performance and modularity.

Software Developer | Ngong Road Children's Foundation (NRCF)

Jan 2025 – April 2025

(Operation - Full time | On Site)

Maintained and optimized organizational technology systems to support educational outreach.

Tech Stack: PHP, Laravel, JavaScript, WordPress, Salesforce, Git/GitHub.

- **Student Portal Enhancement:**

Refactored the Student Portal to resolve critical bugs and implemented a paginated image gallery for student sponsors, significantly improving site load speeds and user engagement.

- **System Optimization:**

Conducted routine performance audits and debugging to ensure 99.9% uptime for the organization's primary web assets.

- **Cross-functional Collaboration:**

Partnered with the foundation's mission teams to implement technical solutions that streamlined donor-student communication.

Software Developer & CTO | Sigma Africa Accelerate

Sept 2024 – Feb 2025

(Operation - Remote)

Lead developer and administrator.

Tech Stack: Laravel, React JS, PostgreSQL, Vercel, Git/GitHub.

- Leading the tech innovation behind Sigma Africa by bootstrapping the Website and managing the website.
- Lead the tech research for Sigma's improvements and advocate for the steps to be taken to improve the website.
- Collaborate with team members to come up with the best system for sigma by advocating for an efficient and respectful feedback loop.

Volunteer Art & Craft Trainer | Maisha Yangu Organization

April 2024 – March 2025

(Operation - On Site | Saturdays)

- Managed an art class of 17 children, fostering creativity through drawing and painting while coordinating talent showcases and resource requirements.

EDUCATION

- Bachelor of Art in Psychology | Kisii University (2022 – Present)
- Certificate in Software Engineering | Moringa School (2024 – 2025)
- KCSE (Grade C+) | Hospital Hill High School (2019 – 2022)
